

Solocarbon® vs. Carbon Surround

Feature	Solocarbon®	Carbon Surround
Heater Technology	Solocarbon® - The only clinically tested heater exclusive to the Signature™ Line!	Wide Spectrum Carbon
Heater Warranty	Lifetime	Lifetime
Company Advises in the Manufacturing of Heaters (total quality control)	✔ Yes	✘ No Data
Independently Tested	✔ Yes	✘ No Data
Clinically Tested	✔ Yes	✘ No Data
Shown to Increase Core Temperature	✔ Yes	✘ No Data
Company Advises in the Manufacturing of Heaters (total quality control)	✔ Yes	✘ No Data
No Unhealthy Gases <small>This has been tested and approved by APEX Environmental Consultants.</small>	✔ Yes	✘ No Data

- ▶ Solocarbon® is exclusive technology used only in Sunlight Saunas™.
- ▶ Solocarbon® is the only far infrared saunas heater to be clinically tested by an accredited University.
- ▶ Solocarbon® has shown to emit MORE far infrared which promotes a deeper sweat.
- ▶ More credible doctors recommend saunas with Solocarbon® than any other heating technology.
- ▶ Our Solocarbon® saunas heater uses organic carbon due to the effectiveness and efficiency of carbon.
- ▶ Solocarbon® saunas heater provides continuous and evenly distributed far infrared heat so the customer will receive a constant flood of heat. Constant, high quality, organic carbon equates to better relaxation, pain relief, weight loss, detoxification, skin purification and lowered blood pressure.
- ▶ Conventional and other far infrared saunas heaters operate at a surface temperature between 300° F and 1000° F. Solocarbon® saunas heaters operate at a low 100° - 200° F. More of the vital far infrared light energy is emitted at a lower surface temperate.
- ▶ Our saunas manufacturing process is quality controlled with ISO 9001 quality systems.
- ▶ With Solocarbon® saunas heaters, the carbon panel is applied as a liquid to ensure even distribution and quality. After it is allowed to dry the panels are sealed by a heat lamination process.
- ▶ Again, this means Solocarbon® saunas heaters have NO UNHEALTHY GASES released during heating.
- ▶ So why pay more? You will get what you pay for. At Sunlight Saunas™, we inspect each carbon heater and sauna separately and guarantee our quality – for a lifetime. You will not have to replace your Sunlight Sauna.
